Date: November 9, 2021

AccentWeb is a digital marketing agency located in Carman Manitoba. Marilyn Smith, Owner and sole proprietor has been in the business since 1997 offering websites, hosting, domain name, email and graphic design. We develop websites for small to medium sized business and not for profit organizations.

Marilyn has a support team of contractors that contribute to a cohesive client focused high performing digital solution for our valued clients.

We host over 80 websites and are a reseller of GoDaddy and Google products for Web Agencies.

AccentWeb manages all our sites on a single panel in terms of plugin and theme updates, backups, etc.

Junior Web Developer

JOB DESCRIPTION:

An entry-level front end web developer helps create the user interface and interactive aspects of a website. As an entry-level worker, you assist members of the web development team who program websites using HTML, CSS, and JavaScript code.

We are looking for a dynamic junior web developer to join our team. You will be assisting with website builds, implementing new design features, and working to ensure that the underlying structure of a client's website is correct. You will be taking direction from senior developers and assisting with all aspects of website and application design.

To ensure success as a junior web developer, you need to possess excellent website design skills and meticulous attention to detail. Ultimately, a top-notch junior web developer should be able to work well under pressure in a highly technical environment.

Junior Web Developer Responsibilities:

- Assisting the web development team with all aspects of website and application design.
- Assisting with the testing and maintenance of backend and front-end applications.
- Brainstorming new tech applications such as digital storage and mobile technology.
- Collaborating with developers to implement new web features.
- Keeping up-to-date with the latest technology and programming trends.

- Converting video, audio, written, and graphic components into compatible formats for the web.
- Using user feedback to identify and correct problems with a client's website.

Junior Web Developer Requirements:

- A bachelor's degree in information technology, computer science, or a similar field.
- At least 2 years' working experience.
- Experience working with coding languages such as HTML, Python JQuery, JSON, and Ajax.
- Solid understanding of web design and development principles.
- Good planning, analytical, and decision-making skills.
- A portfolio of web design and projects you've worked on.
- Critical-thinking skills.
- Flexibility in the workplace.
- In-depth knowledge of software prototyping and UX design tools.
- Goal-orientated and deadline-driven.
